

Serial No. 10/635,929

REMARKS

The present amendment is presented in a REISSUE APPLICATION and, as such, is governed by the provisions of 37 CFR 1.173. The provisions of **37 CFR 1.121 are inapplicable.**

More specifically, as clearly set forth at section (a) therein, the provisions of 37 CFR 1.121 are applicable to "Amendments in applications, *other than reissue applications...*" [emphasis added]. Thus, following description of the manner of making amendments in non-reissue applications, this section explicitly sets forth at paragraph (d) that:

"Any amendment to the description and claims in reissue applications *must* be made in accordance with § 1.173."

Therefore, inasmuch as the present application is a reissue application, the amendment herein is not required to, and indeed does not, adhere to the provisions of 37 CFR 1.121.

In that regard, as amendments in reissue applications are governed by the provisions of 37 CFR 1.173, it is noted that 37 CFR 1.173 (b)(2) requires each amended claim to include a parenthetical expression "amended" to follow the claim number. Accordingly, such an annotation is provided herein.

As further required therein, "Each changed patent claim and each added claim must include markings pursuant to paragraph (d) of this section". 37 CFR 1.173(d) provides that

"Any *changes relative to the patent* being reissued which are made to the specification, including the claims, upon filing, or by an amendment paper in the reissue application, must include the following markings:

- (1) The matter to be omitted by reissue must be enclosed in brackets; and
- (2) The matter to be added by reissue must be underlined..."

Inasmuch as the changes provided herein are not relative to the patent but, instead, are relative to the newly submitted claims, the only appropriate markings are the provision of underlining to the entirety of added claims 5 and 8, as amended.

Serial No. 10/635,929

Nonetheless, the following courtesy copy is provided to demonstrate the specific changes made by the present changes to new claims 5 and 8 as originally filed.

5 (Amended). A terminal according to claim 4, wherein said terminal is arranged to receive from said apparatus data converted [in] to a form matching said capability.

8 (Amended). An information processing apparatus according to claim 7, further comprising a data form converting unit for converting a format of various data into another format, said data form converting unit being arranged to perform conversion to convert said data [in] to a form matching said capability.

Inasmuch as the present amendment conforms to the requirements for amendment in reissue applications, approval and entry of the same is in order and is courteously requested.

Respectfully Submitted,

Israel Gopstein
